• Claims about the safety or serious side effects of COVID-19 vaccines, including:
  • Claims that COVID-19 vaccines kill or seriously harm people, which we define as leading to any of the following harmful side effects:
    • Death
    • Amyotrophic Lateral Sclerosis (ALS)
    • Multiple sclerosis
    • COVID-19 or a new COVID-19 strain
    • Autism
    • Miscarriages
    • Infertility or sterilization
    • Altering DNA
    • Blood clots (except in relation to specific vaccines for which public health authorities have found possible links or are officially investigating such reports)
  • Other side-effects which are incredulous or irrational, such as taking the vaccine turns you into a monkey
Discouraging good health practices: There are a number of good health practices public health authorities advise people take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. Public health authorities have issued emergency use authorization for several COVID-19 vaccines, so in addition to false claims about face masks, social distancing and testing, we do not allow false claims about the vaccines or vaccination programs which public health experts have advised us could lead to COVID-19 vaccine rejection. This includes false claims about the safety, efficacy, ingredients, development, existence, or conspiracies related to the vaccine or vaccination program. As more information becomes available about COVID-19 vaccines, we will continue to iterate on how we apply this policy. This includes:

- Claims about wearing a face mask, including:
  - Claims that wearing a face mask does not help prevent the spread of COVID-19
  - Claims that face masks include or are connected to 5G technology
  - Claims that wearing a face mask can make the wearer sick
“I have witnessed vaccine injury... it's not rare, despite what you're led to believe or told.”

Similarly, for the duration of the COVID public health emergency, we remove content that repeats other false health information, primarily about vaccines, that are widely debunked by leading health organizations such as the World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC). The goal of this policy is to combat misinformation about vaccinations and diseases, which if believed could result in reduced vaccinations and harm public health and safety. The claims we have applied this to include:

- Vaccines cause autism
  - Ex: “Increased vaccinations are why so many kids have autism these days.”

- Vaccines cause Sudden Infant Death Syndrome
  - Ex: “Don’t you know vaccines cause SIDS?”

- Vaccines cause the disease against which they are meant to protect, or cause the person to be more likely to get the disease
  - Ex: “Taking a vaccine actually makes you more likely to get the disease since there’s a strain of the disease inside. Beware!”

- Vaccines or their ingredients are deadly, toxic, poisonous, harmful, or dangerous
"They were treating patients and cured every single one of them with therapeutic drugs like Hydroxychloroquine and Ivermectin." – 0:58

- Guaranteed cures or prevention methods for COVID-19: Public health authorities, such as the WHO, say there is currently nothing that can guarantee recovery or guarantee the average person will not get COVID-19. We have also heard from public health authorities that if people thought there was a guaranteed cure or prevention for COVID-19, that could lead them to take incorrect safety measures, ignore appropriate health guidance, or even attempt harmful self-medication. This is why we don’t allow false claims about how to cure or prevent COVID-19. This includes:

  - Claims that for the average person, something can guarantee prevention from getting COVID-19 or can guarantee recovery from COVID-19 before such a cure or prevention has been approved, including:
    - Consuming or inhaling specific items
    - Medical or herbal remedies
    - External remedies for the outer body or skin
False or misleading information about the efficacy and/or safety of preventative measures, treatments, or other precautions to mitigate or treat the disease.

We will label or remove false or misleading information about:

- The safety or efficacy of treatments or preventative measures that are not approved by health authorities, or that are approved by health authorities but not safe to administer from home;
- The sale or facilitation of medicines or drugs that require a prescription or physician consultation;
- Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
The “Rona” is a false flag to change society as we know it. There, I said it. Wait, I’ve been saying that since it all started.
If the people realized how faulty the PCR test is, there would be a revolution overnight.

False or misleading information about the prevalence of the virus, or risk of infection or death.

We will label or remove false or misleading information about:

- The prevalence of the virus or the disease, such as information pertaining to test results, hospitalizations, or mortality rates;
“This is all going to be eventually on the MAM—mamm.org—website, about all the bleeding stuff you've been hearing about and the--the decidual casts, you know, where women who've been around those--<Makes “V” symbol with fingers>--who suddenly--the entire inside of their uterus just, you know, comes out.” – 1:25 - 1:55

- Claims about the safety or serious side effects of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines kill or seriously harm people, which we define as leading to any of the following harmful side effects:
    - Death
    - Amyotrophic Lateral Sclerosis (ALS)
    - Multiple sclerosis
    - COVID-19 or a new COVID-19 strain
    - Autism
    - Miscarriages
    - Infertility or sterilization
    - Altering DNA
    - Blood clots (except in relation to specific vaccines for which public health authorities have found possible links or are officially investigating such reports)
  - Other side-effects which are incredulous or irrational, such as taking the vaccine turns you into a monkey
“I'D BE WILLING TO BET THAT MORE AND MORE OF YOU ARE SEEING THE EVIDENCE THAT THIS CURE <M A K E S “V SHAPE WITH FINGERS> ISN’T NEARLY AS SAFE AND EFFECTIVE AS WE HAVE BEEN LED TO BELIEVE. ANOTHER BLACK WOMAN—WHO’S A LAWYER—JUST DIED, AGE 47, IN NEW YORK.” – 4:27-4:48

- Claims about the safety or serious side effects of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots)

4. Shocking Stories:
- Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are unsafe, ineffective, sacrilegious or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

  • Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots)
"Don’t fear the virus. Contagion is nothing but a myth. Our bodies work within nature. God bless the microbiome."

Under our Community Standards, we remove misinformation when public health authorities conclude that the information is false and likely to contribute to imminent violence or physical harm. Since COVID-19 was declared a Public Health Emergency of International Concern (PHEIC) in January 2020, we have applied this policy to content containing claims related to COVID-19 that, according to public health authorities, are (a) false, and (b) likely to contribute to imminent physical harm (of imminent physical harm examples include: increasing the likelihood of exposure to or transmission of the virus, or having adverse effects on the public health system’s ability to cope with the pandemic). The goal of this policy is to reduce health harm to people, while also allowing people to discuss, debate and share their personal experiences, opinions and news related to the COVID-19 pandemic. More specifically, we remove false information about:

- The existence or severity of COVID-19. Acknowledging the existence and understanding the severity of COVID-19 is foundational to keeping people safe and aware of the dangers of this public health emergency. We remove claims that deny the existence of the disease or undermine the severity of COVID-19. This includes:
  - Claims that deny the existence of the COVID-19 disease or pandemic
  - Claims that downplay the severity of COVID-19, such as:
    - Claims that COVID-19 is no more dangerous to people than the common flu or cold
    - Claims that no one has died from COVID-19
    - Claims that the mortality rate of COVID-19 is the same or lower than seasonal influenza
    - Claims that getting a flu shot or flu vaccine is more likely to kill you than COVID-19
    - Claims that the number of COVID-19 caused deaths are much lower than the official figure (requires additional information and/or context)

- COVID-19 transmission and immunity: Understanding how COVID-19 is transmitted and who can be infected is a critical component of protecting people from getting or spreading the virus. Public health authorities state that COVID-19 can be transmitted in any location and primarily from person to person through small droplets from the nose or mouth, which are expelled when a person with COVID-19 coughs, sneezes or speaks. Public health authorities also agree that all people, regardless of age or other unique characteristics, can be infected with and spread COVID-19. We remove false claims about how and where COVID-19 can be transmitted and who can be infected.
“So here we are, suddenly, with humanity, being inoculated with a synthetic mRNA that can and does get into the DNA, even though they say, oh, it doesn’t.” 2:52-3:08

“So here’s one of the things we know that I learned from Larry, Dr. Larry polewski, who I adore. And that is that there there was one woman This is a case that they had where she got herself that shot, and was nursing her six months old and the baby died.” 5:35-5:51

Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
“This is all going to be eventually on the MAM—mamm.org—website, about all the bleeding stuff you've been hearing about and the--the decidual casts, you know, where women who've been around those--<Makes “V” symbol with fingers>--who suddenly--the entire inside of their uterus just, you know, comes out.” – 1:25 - 1:55
“ONE OF THE THINGS WE KNOW IS THAT THE SHOT CAN COUNTER SYNCTIN WHICH IS...ABSOLUTELY NECESSARY FOR THE DEVELOPMENT OF A HEALTHY PLACENTA.” – 7:36

False or misleading information about the efficacy and/or safety of preventative measures, treatments, or other precautions to mitigate or treat the disease.

We will label or remove false or misleading information about:

- The safety or efficacy of treatments or preventative measures that are not approved by health authorities, or that are approved by health authorities but not safe to administer from home;
- The sale or facilitation of medicines or drugs that require a prescription or physician consultation;
- Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
Kevin Jenkins
Apr 21

“[I] just came from a supermarket in Tulsa; it was great to connect—I connected with so many people. It was just amazing to see so many Americans unmasked, seeking the truth, trying to find out the information that was important for their families and their communities. And I gotta tell you, it was very touching. But one of the things I got out of it, a lot of us as Americans, we’re not talking about the same thing. They didn’t know about the vaccine passport, they didn’t really know about the dangers of this vaccine biologic that’s being put in their bodies right now. They didn’t know. So we have a lot of work to do.”

1:08 - 1:42
“I think we’ve done a lot of work analyzing telling everyone in the world that the PCR test is a fraud.” 6:37
This form was created to assist families in communicating regarding and to prepare for the family-wide financial impact of adverse events, if any, resulting from a Covid-19 injection. Examples of adverse events from Covid-19 injections include Covid-19 infection, anaphylaxis, neurological disorders, autoimmune diseases; other long-term chronic diseases; blindness and deafness; infertility, fetal damage, miscarriage, and stillbirth; and death (see Table 1 for examples of each).

What Are the Covid-19 Injections?

The leading Covid-19 injections currently in use in the U.S. and other OECD countries are experimental messenger RNA (mRNA) injections developed by Pfizer (with German partner BioNTech) and by biotechnology company Moderna in partnership with the National Institute of Allergy and Infectious Diseases (NIAID). The two experimental products are being distributed through emergency use authorizations (called “conditional marketing authorization” in the EU and “provisional approval” in Australia) granted following abbreviated clinical trials and without long-term safety testing. As yet, neither injection has received full approval or license from the FDA or any other national regulatory agency.

Though marketed as “vaccinations,” the Covid-19 mRNA injections are experimental gene therapy. Vaccine developers openly describe the never-before-authorized mRNA approach as a means of “programming a person’s cells” or, using Moderna’s terminology, deploying new “software.” In prior research, mRNA injections have displayed an unusual inflammatory component that has made it difficult to establish an association with any adverse reaction.

The mRNA approach requires an invasive “gene delivery system” (also called a “carrier system”) to deliver the genetic mRNA into the cell’s cytoplasm before the mRNA is transcribed into protein. The mRNA is injected into the muscle of the arm or leg; Pfeiffer and Moderna’s Covid-19 injections use lipid nanoparticles (LNPs) for the purpose. The LNPs are not only shielded in the mRNA and protect sensitive oligos but also function as adjuvants, “warming up” the immune system. Pfeiffer’s and Moderna’s LNPs are coated with polylithium glycol (PLG), a synthetic, non-toxic, and non-toxic polymer associated with adverse immune responses. Moderna acknowledges that its LNP-coated mRNA can cause significant adverse events. The mRNA has identified PEG as the possible culprit responsible for anaphylactic reactions to the Covid-19 injections.

In late February, the FDA authorized a third Covid-19 injection for emergency use in the U.S., manufactured by Johnson & Johnson’s Belgian-based pharmaceutical subsidiary, Janssen. Janssen’s injection is an adenovirus-vector vaccine; that is, the mRNA injections, is intended to “ask” the cells to make the coronavirus Spike protein (S protein). Unlike mRNA, the adenovirus is a genetically modified live common cold virus as a Trojan horse to “distract” the cells’ immune systems from fighting off the virus.

• Claims about the safety or serious side effects of COVID-19 vaccines, including:

Claims that it was manufactured or bioengineered

Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are unsafe, ineffective, sacrilegious or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

Content that otherwise does not violate our COVID-19 or vaccine policies above but that implicitly discourages vaccination by advocating for alternatives or celebrating those who refuse vaccination. This includes promoting alternative treatments or natural immunity, celebrating those who refuse vaccination, and encouraging vaccine refusals without citing medical rationales or guidance.

The pandemic has been no deadlier overall than the seasonal flu, with the exception of people over the age of 60. All others have a lower risk of dying from COVID-19 than they have of dying from the flu.

We don’t shut down the world and stop living because people die from heart disease, diabetes, cancer, the flu or anything else. So why should COVID-19 be any different?

It appears we are witnessing the unfolding of a carefully orchestrated plan to facilitate and hide the transfer of wealth to unelected technocrats who are controlling the pandemic narrative — all while simultaneously justifying the erosion of your personal freedoms and civil liberties.

**The existence or severity of COVID-19.** Acknowledging the existence and understanding the severity of COVID-19 is foundational to keeping people safe and aware of the dangers of this public health emergency. We remove claims that deny the existence of the disease or undermine the severity of COVID-19. This includes:

  - Claims that getting a flu shot or flu vaccine is more likely to kill you than COVID-19
  - Claims that the number of COVID-19 caused deaths are much lower than the official figure (requires additional information and/or context)
As Bad as Things May Seem, You Have Little to Fear

I know it all looks and sounds very daunting and overwhelming. However, when you take a deep look at all the new and emerging evidence we present in "The Truth About COVID-19," it’s apparent that very little of what’s happening makes sense.

I hope you will allow me to confidently assure you, "The Truth About COVID-19" is far more than just a compilation of our personal opinions. For the writing of this book, we tapped into more than 400 sources of trustworthy, reliable data and facts.

I believe that after you finish reading this book, you’ll find there’s really nothing to fear, but actually much to feel hopeful about.

That’s at least partly because we provide indisputable proof that this pandemic has been used as a convenient cover-up. I review the evidence that it was preplanned with the mainstream manipulation of the facts to inflame the danger posed by this infection.

Admittedly, people have indeed died from COVID-19. It’s been a painful journey for many. However, in contrast to what the media have told you, the hard evidence of careful review of the data shows there are no excess deaths due to the virus. The total overall mortality numbers for 2020 are normal.
The existence or severity of COVID-19. Acknowledging the existence and understanding the severity of COVID-19 is foundational to keeping people safe and aware of the dangers of this public health emergency. We remove claims that deny the existence of the disease or undermine the severity of COVID-19. This includes:

We are now living in a world that is increasingly ruled, not by our democratic systems and institutions, but by public health fiat, carried out by politicians who rule by instilling fear and panic.

In The Truth About COVID-19, Dr. Mercola and Cummins reveal new and emerging evidence that:

- The SARS-CoV-2 virus was, indeed, lab-engineered and emerged from a negligently managed bioweapons lab in Wuhan, China
- The global pandemic was long anticipated by global elites who have used it to facilitate and hide the largest upward transfer of wealth in human history
- PCR testing, case counts, morbidity, and vaccine safety and efficacy data have been widely manipulated and misrepresented
- Obesity, diabetes, and heart disease are known to worsen COVID-19 outcomes, but the junk food industry continues to push its agenda at the expense of public health
- Safe, simple, and inexpensive treatment and prevention for COVID-19 have been censored and suppressed to create a clear path for vaccine acceptance
- Effectiveness of the vaccines has been wildly exaggerated and major safety questions have gone unanswered

COVID-19 is manmade, including

Claims that it was manufactured or bioengineered

Gates has these incestuous relationships with Anthony Fauci that go back 20 years where he's, you know, paying Fauci and they have all kinds of really corrupt financial entanglements with each other. They, you know, he brought out to his house in 2000—his $189 million house in Seattle, brought him into the den, sat him down and said, I want to have a partnership with you. The way that Fauci explains it is that Fauci would develop the drugs, and then pass them on to the, to the drug companies—the Mercks and [inaudible] and Johnson and Johnson—and then Gates would guarantee markets in Africa through his control of WHO. And those companies [sic] don't want to get vaccines after because it's very uncertain. You know, Botswana has a government this year that says yeah, we want them and next year—and Gates, because he controls WHO, he controls those companies—those countries—because WHO pays for their health ministries and supplies all their HIV medications, and they have to do what WHO tells them to do. So he can require those company—those countries—to buy the vaccines from these companies. And he then is invested in the companies—in Merck, he owns—you know, and by the way, Gates has no pretension that he gives a crap about public health. His other investments are in tobacco companies, in processed foods, in Coca Cola, in Cargill, in Monsanto, in Philip Morris Kraft—you know—cheese—and then all the oil companies which he own stakes in virtually all of them. So he is not a guy who cares about climate, or who cares about public health. He is a guy who cares about control.
COVID-19 is manmade, including

- Claims that it was manufactured or bioengineered

Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are unsafe, ineffective, sacrilegious or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

We are now living in a world that is increasingly ruled, not by our democratic systems and institutions, but by public health fiat, carried out by politicians who rule by instilling fear and panic.

In The Truth About COVID-19, Dr. Mercola and Cummins reveal new and emerging evidence that:

- The SARS-CoV-2 virus was, indeed, lab-engineered and emerged from a negligently managed bioweapons lab in Wuhan, China
- The global pandemic was long anticipated by global elites who have used it to facilitate and hide the largest upward transfer of wealth in human history
- PCR testing, case counts, mortality, and vaccine safety and efficacy data have been widely manipulated and misrepresented
- Obesity, diabetes, and heart disease are known to worsen COVID-19 outcomes, but the junk food industry continues to push its agenda at the expense of public health
- Safe, simple, and inexpensive treatment and prevention for COVID-19 have been censored and suppressed to create a clear path for vaccine acceptance
- Effectiveness of the vaccines has been wildly exaggerated and major safety questions have gone unanswered

This important trace element has been previously associated with rates of survival in people with viral diseases. Find out more about its health effects.

CLAIMS:
- Claims that for the average person, something can guarantee prevention from getting COVID-19 or can guarantee recovery from COVID-19 before such a cure or prevention has been approved, including:
  - Consuming or inhaling specific items
  - Medical or herbal remedies
  - External remedies for the outer body or skin

Content that otherwise does not violate our COVID-19 or vaccine policies above but that implicitly discourages vaccination by advocating for alternatives or celebrating those who refuse vaccination. This includes promoting alternative treatments or natural immunity, celebrating those who refuse vaccination, and encouraging vaccine refusals without citing medical rationales or guidance.
It's estimated that 129 billion face masks are used worldwide each month. Find out the possible effects of this on the environment and human health.

• Claims about wearing a face mask, including:
  • Claims that wearing a face mask does not help prevent the spread of COVID-19
  • Claims that face masks include or are connected to 5G technology
  • Claims that wearing a face mask can make the wearer sick

Adding insult to injury, the first randomized controlled trial of more than 6,000 individuals to assess the effectiveness of surgical face masks against SARS-CoV-2 infection found masks did not statistically significantly reduce the incidence of infection.26

Considering the lack of evidence for their use, and the potential harms to human health and the environment, it's no wonder that calls for peaceful civil disobedience against mandatory masking are growing. The U.S. nonprofit Stand for Health Freedom has a widget you can use to contact your government representatives to let them know wearing a mask must be a personal choice.
This mainstream media writer claims that individuals who'll refuse the COVID vaccine will incur higher healthcare costs. Should you trust this argument?

- Claims about the efficacy of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines do not provide any immunity to people
  - Claims that COVID-19 vaccines are not effective in preventing COVID-19

Content that otherwise does not violate our COVID-19 or vaccine policies above but that implicitly discourages vaccination by advocating for alternatives or celebrating those who refuse vaccination. This includes promoting alternative treatments or natural immunity, celebrating those who refuse vaccination, and encouraging vaccine refusals without citing medical rationales or guidance.

The vaccines are not foolproof. In fact, so-called "breakthrough cases," meaning cases in which a fully vaccinated individual is diagnosed with COVID-19 are to be expected. I'm not sure why anyone is surprised, seeing how the vaccine makers have acknowledged that the mRNA injections are not designed to actually make you immune to SARS-CoV-2.
“This is no different than the regular flu, the numbers, even with them artificially inflating them, haven’t changed anything.”
The thing that everyone should know about all of these shots is that they all result in the same thing: They all create a spike protein, and they all create a spike protein antibody. Both the spike protein and the spike protein antibodies have various different ways that they can cause you to be sick and kill you. And the blood clotting incident—the blood clotting—is with all of the approved shots—all of them.

PODCAST

Discouraging good health practices: There are a number of good health practices public health authorities advise people to take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. Public health authorities have issued emergency use authorization for several COVID-19 vaccines, so in addition to false claims about face masks, social distancing and testing, we do not allow false claims about the vaccines or vaccination programs which public health experts have advised us could lead to COVID-19 vaccine rejection. This includes false claims about the safety, efficacy, ingredients, development, existence, or conspiracies related to the vaccine or vaccination program. As more information becomes available about COVID-19 vaccines, we will continue to iterate on how we apply this policy. This includes:

- Claims about wearing a face mask, including:
  - Claims that wearing a face mask does not help prevent the spread of COVID-19
  - Claims that face masks include or are connected to 5G technology
  - Claims that wearing a face mask can make the wearer sick

- Claims that social/physical distancing does not help prevent the spread of COVID-19
"The thing that everyone should know about all of these shots is that they all result in the same thing: They all create a spike protein, and they all create a spike protein antibody. Both the spike protein and the spike protein antibodies have various different ways that they can cause you to be sick and kill you. And the blood clotting incident—the blood clotting—is with all of the approved shots—all of them."

— Sherri Tenpenny

5:04-5:41

**False or misleading information about the efficacy and/or safety of preventative measures, treatments, or other precautions to mitigate or treat the disease.**

We will label or remove false or misleading information about:

- The safety or efficacy of treatments or preventative measures that are not approved by health authorities, or that are approved by health authorities but not safe to administer from home;
- The sale or facilitation of medicines or drugs that require a prescription or physician consultation;
- Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
The thing that everyone should know about all of these shots is that they all result in the same thing: They all create a spike protein, and they all create a spike protein antibody. Both the spike protein and the spike protein antibodies have various different ways that they can cause you to be sick and kill you. - Discouraging good health practices: There are a number of good health practices public health authorities advise people take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. Public health authorities have issued emergency use authorization for several COVID-19 vaccines, so in addition to false claims about face masks, social distancing and testing, we do not allow false claims about the vaccines or vaccination programs which public health experts have advised us could lead to COVID-19 vaccine rejection. This includes false claims about the safety, efficacy, ingredients, development, existence, or conspiracies related to the vaccine or vaccination program. As more information becomes available about COVID-19 vaccines, we will continue to iterate on how we apply this policy. This includes:

  - Claims about wearing a face mask, including:
    - Claims that wearing a face mask does not help prevent the spread of COVID-19
    - Claims that face masks include or are connected to 5G technology
    - Claims that wearing a face mask can make the wearer sick
  - Claims that social/physical distancing does not help prevent the spread of COVID-19
“This is not a vaccine. A vaccine is supposed to protect us against a bacterial or viral infection. There is nothing in any of these shots that is designed to protect us against a virus infection.” - Larry Palevsky 11:11-11:26

“It was never ever made to protect against viral infections. As soon as we start to realize that that is not what this is, realize that everything after that is a complete and utter lie. This vaccine is not designed to protect us.” - Larry Palevsky 11:35-11:50

“Claims about the efficacy of COVID-19 vaccines, including:

- Claims that COVID-19 vaccines do not provide any immunity to people
- Claims that COVID-19 vaccines are not effective in preventing COVID-19

Similarly, for the duration of the COVID public health emergency, we remove content that repeats other false health information, primarily about vaccines, that are widely debunked by leading health organizations such as the World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC). The goal of this policy is to combat misinformation about vaccinations and diseases, which if believed could result in reduced vaccinations and harm public health and safety. The claims we have applied this to include:

- Vaccines are not effective to prevent the disease against which they purport to protect
- Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are unsafe, ineffective, sacrilegious or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

Sherri Tenpenny
Apr 22
“It’s all to get to the vaccine, I think. And I didn’t used to think that, but it is, it’s—that seems to be their endpoint.

I mean, you know, the CDC came out with new data yesterday, saying there’s now—the VAERS database now has over 3000 reported deaths, and over 62,000 reported adverse events. And as we know that somewhere between one and 10% of abnormal events, it’s captured. And so, and the over the 3000 deaths, that is more deaths in a four-month period of time from one shot than usually is accumulated over a year with 17 shots. But there’s no end in sight.” 9:06–9:47

- Claims about the safety or serious side effects of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots).
  - Claims that COVID-19 vaccines cause harmful diseases such as ALS, multiple sclerosis, COVID-19, the new COVID strain, or autism.
  - Claims that building immunity by getting COVID-19 is safer than getting the vaccine.
  - Claims that COVID-19 vaccines are unsafe for a specific group of people, if that group is identified based on protected characteristics or other identifiers that are not directly related to their personal health, age, or disabilities (e.g., social status, religion, or political views).
  - Claims that the COVID-19 vaccine changes people’s DNA.
  - Claims that COVID-19 vaccines cause infertility, miscarriages or sterility.
  - Claims about the side effects of COVID-19 vaccines which are incredulous or irrational, such as taking the vaccine turns you into a monkey.

- Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are unsafe, ineffective, sacrificial or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

VAERS Vaccine Adverse Event Reporting System
www.vaers.hhs.gov

Guide to Interpreting VAERS Data

When evaluating data from VAERS, it is important to note that for any reported event, no cause-and-effect relationship has been established. Reports of all possible associations between vaccines and adverse events (possible side effects) are filed in VAERS. Therefore, VAERS collects data on any adverse event following vaccination, be it coincidental or truly caused by a vaccine. The report of an adverse event to VAERS is just documentation that a vaccine caused the event.

- Claims about the safety or serious side effects of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots)
  - Claims that COVID-19 vaccines cause harmful diseases such as ALS, multiple sclerosis, COVID-19, the new COVID strain, or autism
  - Claims that building immunity by getting COVID-19 is safer than getting the vaccine
  - Claims that COVID-19 vaccines are unsafe for a specific group of people, if that group is identified based on protected characteristics or other identifiers not directly related to their personal health, age, or disabilities (e.g., social status, religion, or political views)
  - Claims that the COVID-19 vaccine changes people’s DNA
  - Claims that COVID-19 vaccines cause infertility, miscarriages or sterility
  - Claims about the side effects of COVID-19 vaccines which are incredulous or irrational, such as taking the vaccine turns you into a monkey
Discouraging good health practices: There are a number of good health practices public health authorities advise people take to protect themselves from getting or spreading COVID-19. Rizza Islam was live.

April 13 at 4:33 PM

Just watched the J&J FDA review board. What they are NOT telling you... Just reviewed the FDA's audio meeting on the J&J shot and they left out a LOT of information.

Text mycolleagues TO 833-317-1384
Follow me on @fanbaseapp and @melanated_people_social - Link here to order Rizzas book - https://rizza-ismail.myshopify.com/.../message-to-millions

VAERS data: "VAERS - Data Sets" https://vaers.hhs.gov/data/datasets.html

Email: Islclbookings@gmail.com to schedule Rizza Islam for interviews

"And now over 2,342 deaths connected directly to and as a result of these experimental shots." 2:26
Rizza Islam

Are you listening yet? Or does it need to get worse? @notanothertuskegeeexperiment – J&J has shut down MULTIPLE vaccine trials due to MULTIPLE adverse reactions and it has become so bad that they’ve decided to pause the administration of this shot completely until the “review” has been concluded. ... According to the Vaccine adverse event reporting system (VAERS) there have been over 2,000 deaths as well as over 38,000 adverse reactions as a result of these EXPERIMENTAL shots. Click here for documentation: https://vaers.hhs.gov/data/datasets.html. Question, will YOU be taking this even AFTER the so-called “review”? Let us know. Link in the BIO to order Rizzas book as well as your not another Tuskegee experiment gear. #Rizzasian #notanothertuskegeeexperiment #intellectualextremist #WEAREFARRAKHAN #sepationordeath #CovidVaccine

The FDA & CDC Are Recommending A Pause In The Use Of The Johnson & Johnson Vaccine As They Review Rare Blood Clots Cases.

today FDA and @CDCgov issued a statement regarding the Johnson & Johnson #COVID19 vaccine. We are recommending a pause in the use of his vaccine out of an abundance of caution.
“More people have died from these experimental shots in the last four months than the 600 people who died during the Tuskegee experiment in 40 years.” 1:18
“Fuck that—I’m not getting no flu shot because it’s flu season . . . You don’t need that shot. They shooting some shit in your ass . . . I don’t want none of that . . . I think they shoot some control in you . . . Some shit to take control of you.”
Spelman, Morehouse, & Clark Atlanta Will Now Require Students & Staff To Be Vaccinated Before Returning To Campus

And it beginsssss........

Now, WHO WILL STAND UP AND REFUSE?

246 fully vaccinated Michigan residents test positive for Covid and three die

@mttmillineals

False or misleading information about the efficacy and/or safety of preventative measures, treatments, or other precautions to mitigate or treat the disease.

We will label or remove false or misleading information about:

- The safety or efficacy of treatments or preventative measures that are not approved by health authorities, or that are approved by health authorities but not safe to administer from home;
- The sale or facilitation of medicines or drugs that require a prescription or physician consultation;
- Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
Last summer, without a vaccine, we could travel freely; masks were not mandated for shops until late July and guess what: deaths 'with' CV dropped to literally zero. This summer, with vaccines, we're threatened with more restrictions than last! This is clearly not about a virus.

- **Discouraging good health practices:** There are a number of good health practices public health authorities advise people to take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. Public health authorities have issued emergency use authorization for several COVID-19 vaccines, so in addition to false claims about face masks, social distancing and testing, we do not allow false claims about the vaccines or vaccination programs which public health experts have advised us could lead to COVID-19 vaccine rejection. This includes false claims about the safety, efficacy, ingredients, development, existence, or conspiracies related to the vaccine or vaccination program. As more information becomes available about COVID-19 vaccines, we will continue to iterate on how we apply this policy. This includes:
  - Claims about wearing a face mask, including:
    - Claims that wearing a face mask does not help prevent the spread of COVID-19
    - Claims that face masks include or are connected to 5G technology
    - Claims that wearing a face mask can make the wearer sick
  - Claims that social/physical distancing does not help prevent the spread of COVID-19
Claims about the safety or serious side effects of COVID-19 vaccines, including:

- Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots)
- Claims that COVID-19 vaccines cause harmful diseases such as ALS, multiple sclerosis, COVID-19, the new COVID strain, or autism
- Claims that building immunity by getting COVID-19 is safer than getting the vaccine
- Claims that COVID-19 vaccines are unsafe for a specific group of people, if that group is identified based on protected characteristics or other identifiers not directly related to their personal health, age, or disabilities (e.g. social status, religion, or political views)
- Claims that the COVID-19 vaccine changes people's DNA
- Claims that COVID-19 vaccines cause infertility, miscarriages or sterility
- Claims about the side effects of COVID-19 vaccines which are incredulous or irrational, such as taking the vaccine turns you into a monkey
YOU WANT ME TO WEAR A MASK TO PROTECT YOUR HEALTH?

DO YOU WANT ME TO JOG TO HELP YOU LOSE WEIGHT TOO?

• **Discouraging good health practices:** There are a number of good health practices public health authorities advise people take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. "Vaccines do NOT prevent infection
BUT
Vaccines DO cause disease."

Read the inserts.
Do your research.
Dr. Sherri Tenpenny, DO

Discouraging good health practices: There are a number of good health practices public health authorities advise people take to protect themselves from getting or spreading COVID-19. This includes wearing a face mask, social distancing, getting tested for COVID-19 and, more recently, getting vaccinated against COVID-19. Public health authorities have issued emergency use authorization for several COVID-19 vaccines, so in addition to false claims about face masks, social distancing and testing, we do not allow false claims about the vaccines or vaccination programs which public health experts have advised us could lead to COVID-19 vaccine rejection. This includes false claims about the safety, efficacy, ingredients, development, existence, or conspiracies related to the vaccine or vaccination program. As more information becomes available about COVID-19 vaccines, we will continue to iterate on how we apply this policy. This includes:

- Claims about the efficacy of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines do not provide any immunity to people
  - Claims that COVID-19 vaccines are not effective in preventing COVID-19
• **Access to essential health services:** Public health infrastructure is at the core of the global fight to combat COVID-19. According to the WHO and other public health authorities, previous outbreaks of infectious diseases have shown that disruption to essential services can be more deadly than the outbreak itself, and ensuring access to essential services is the cornerstone of an effective health response. Adverse effects on the public health system’s ability to cope with the pandemic can have a direct impact on helping people stay healthy and safe in this health emergency. We remove content that can contribute to physical harm by inaccurately representing the access to or availability of public health infrastructure. When we have additional information and/or context to identify it, we also prohibit:

• Claims that hospitals kill patients in order to inflate the number of COVID-19 deaths, to get more money, or in order to sell people’s organs
"I got the shot and I’m fine"

This statement is dismissive, condescending, and passive aggressive. It also shows you lack empathy.

Thank God you’re fine because a couple thousand people got the shot and DIED.

• Claims about the safety or serious side effects of COVID-19 vaccines, including:
  - Claims that COVID-19 vaccines kill or seriously harm people (such as, causing blood clots)
  - Claims that COVID-19 vaccines cause harmful diseases such as ALS, multiple sclerosis, COVID-19, the new COVID strain, or autism
  - Claims that building immunity by getting COVID-19 is safer than getting the vaccine
  - Claims that COVID-19 vaccines are unsafe for a specific group of people, if that group is identified based on protected characteristics or other identifiers not directly related to their personal health, age, or disabilities (e.g. social status, religion, or political views)
  - Claims that the COVID-19 vaccine changes people’s DNA
  - Claims that COVID-19 vaccines cause infertility, miscarriages or sterility
  - Claims about the side effects of COVID-19 vaccines which are incredulous or irrational, such as taking the vaccine turns you into a monkey
The existence or severity of COVID-19. Acknowledging the existence and understanding the severity of COVID-19 is foundational to keeping people safe and aware of the dangers of this public health emergency. We remove claims that deny the existence of the disease or undermine the severity of COVID-19. This includes:

- Claims that deny the existence of the COVID-19 disease or pandemic
- Claims that downplay the severity of COVID-19, such as:
  - Claims that COVID-19 is no more dangerous to people than the common flu or cold
  - Claims that no one has died from COVID-19
  - Claims that the mortality rate of COVID-19 is the same or lower than seasonal influenza
  - Claims that getting a flu shot or flu vaccine is more likely to kill you than COVID-19
  - Claims that the number of COVID-19 caused deaths are much lower than the official figure (requires additional information and/or context)
that doctors are being told to code all deaths as covid without so much as the facade of testing when up to 99% of case fatalities are in individuals with multiple pre-existing conditions, the vast majority of them elderly?

Guide to Interpreting VAERS Data

Evaluating VAERS Data

When evaluating data from VAERS, it is important to note that for any reported event, no cause-and-effect relationship has been established. Reports of all possible associations between vaccines and adverse events (possible side effects) are filed in VAERS. Therefore, VAERS collects data on any adverse event following vaccination, be it coincidental or truly caused by a vaccine. The report of an adverse event to VAERS is just documentation that a vaccine caused the event.

• Adverse impacts or effects of receiving vaccinations, where these claims have been widely debunked;
